Thank you for choose Vulture theme

# Documantation

## **1. Install Wordpress**

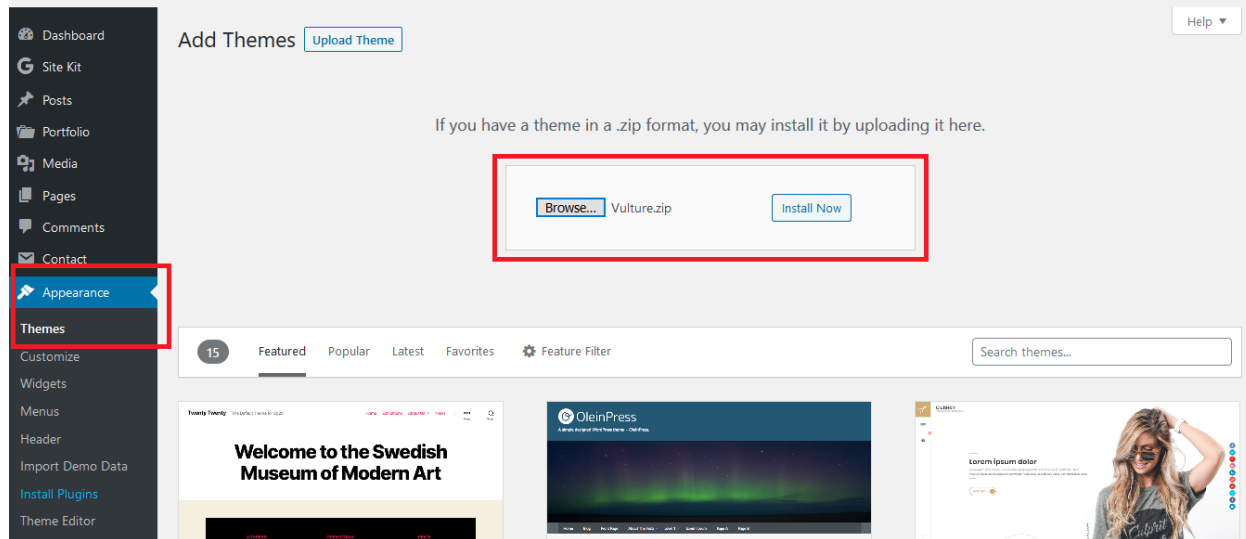

First you must install wordpress on your site. If you don't know about wordpress install watch this video:

[Link video](#)

## **2. Theme Install**

Installing Vulture Theme is like all WordPress themes. There are some ways to install a vulture theme on WordPress.

This is very easy. First go to the wordpress dashboard then go Appearance > themes and click on add new and upload main theme file (zip format).

### 3. Install and active important plugins

After theme active, you see a box for install plugins in top page. Okey! Click on begin installing plugins and select all plugin for install and active their.

### 4. Import demo and setting

Step four is import demo and setting. It's done only one click 😊 You can import demo by XML file too.

For import demo go to the Appearance > import demo data then click on import button. Then waiting for a few minutes, do not close the window or refresh the page until the data is imported.

Appearance

- Themes
- Customize
- Widgets
- Menus
- Import Demo Data**
- Theme Options
- Theme Editor

OptionTree

- Plugins
- Users
- Tools
- Settings
- Google Fonts
- Smush
- Collapse menu

Importing demo data (post, pages, images, theme settings, ...) is the easiest way to setup your theme. It will allow you to quickly edit everything instead of creating content from scratch.

When you import the data, the following things might happen:

- No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified.
- Posts, pages, images, widgets, menus and other theme settings will get imported.
- Please click on the Import button only once and wait, it can take a couple of minutes.

[Switch to manual import!](#)

Please waiting for a few minutes, do not close the window or refresh the page until the data is imported.

Import Demo Data

After import demo data, you must import setting. Don't worry it's easy.

For import setting click on Option Tree in wordpress menu. In import tab, copy and paste text files on import file folder.

#### Settings

paste setting.txt file here

To import your Settings copy and paste what appears to be a random string of alpha numeric characters into this textarea and press the "Import Settings" button.

Import Settings

#### Theme Options

paste theme-option.txt file here then  
click on right button

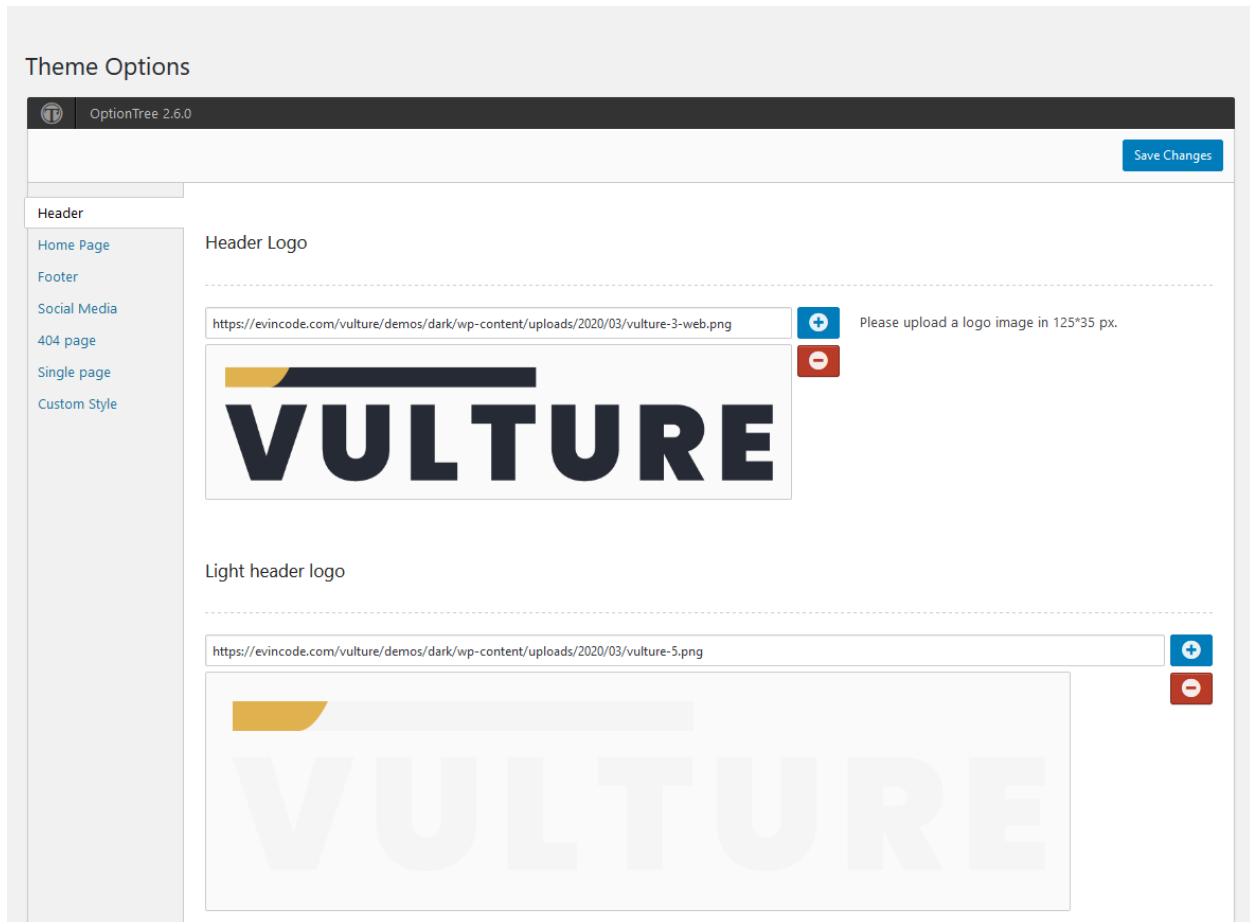

Only after you've imported the Settings should you try and update your Theme Options.

To import your Theme Options copy and paste what appears to be a random string of alpha numeric characters into this textarea and press the "Import Theme Options" button.

Import Theme Options

## 5. Theme Options

Now it's time to customize the theme option. Go to the Appearance > theme option in wordpress menu.

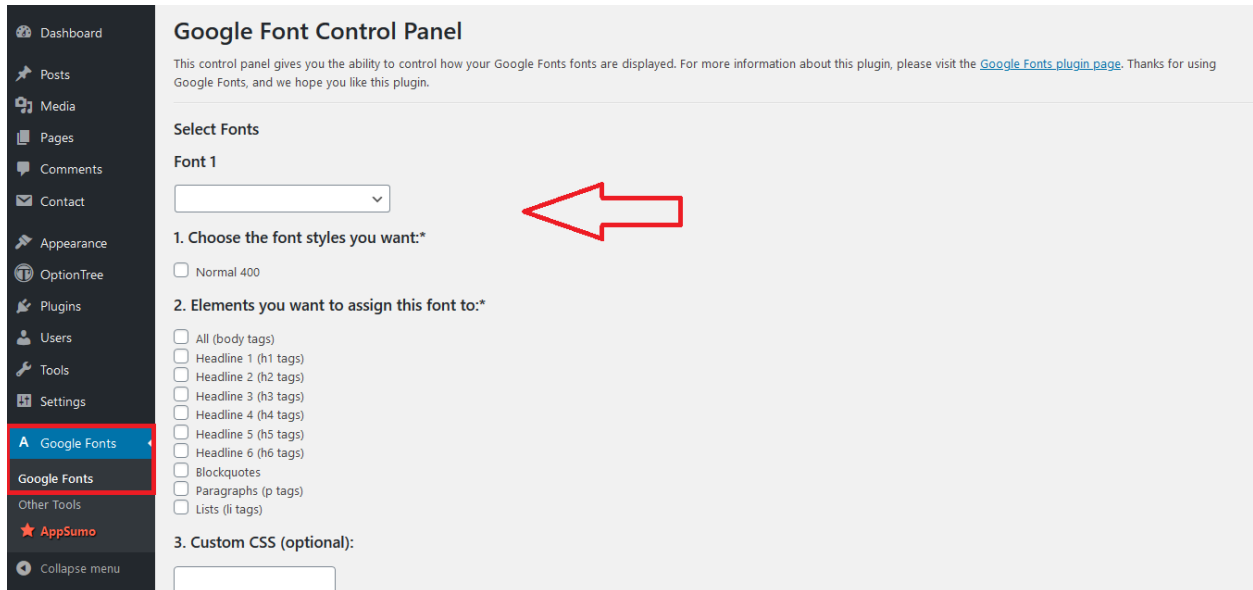

You can customize the theme on this page to your liking. it's interesting! Easy, fast and without code...

## 6. How to change site font?

You can to use [WP Google Fonts plugin](#) for change site font. To change the font of the site follow these steps:

1. Install and active [WP google fonts plugin](#).
2. Go to the Google fonts in wordpress menu.
3. Select google font and save it.
4. Enjoy font.

## 7. Set default featured image

If you would like to define a default featured image for tabs and posts that do not have a featured, follow these steps:

1. Go to the Settings > media in wordpress menu.
2. In Default featured image section, upload or select default featured image.
3. Save it...
